

Serafin Aebli

Komponist & Sound Artist

Serafin Aebli (*1994) is a composer, and sound artist. For his compositions he likes to collaborate with other musicians, but also with other arts, like dance, theater and other transdisciplinary fields. He holds a degree in music and media arts from the Hochschule der Künste Bern (HKB). He will complete his master's degree in composition in 2022 at the Zürcher Hochschule der Künste (ZHdK) with specialization in composition for film, theater and media. In his compositions, he likes to push the technical possibilities and he benefits from the experience he gained as a sound engineer. Many of his works live from the search for new sounds and the reproduction of them on complex loudspeaker systems. In his collaborations, among others with Vivian Wang, Janis Polar, Avital Cohen, the associations Companie O., Alter Ego X, or Projektilart, he functions as composer and often also as performer of live electronics.
